Dear Students,

You've been invited to join The Syndicate.

I've assigned each one you access codes that you must enter along with your name.

To accept the invitation just run the program, enter your name, enter your access code, and we will begin destroying the world.

See you on the other side.

Carlos

P.S. - Oh no! Unfortunately, I misplaced your access codes. Prove you are worthy

==

This program calculates an access code depending on your name.

If the access code is the same as the one you typed in, you get access.

Find a way to circumvent the access code check and accept an incorrect access code.

Deliver: A modified executable that accepts an incorrect access code to join The Syndicate

Use: OLLYDBG
